- (54) Integration of diagnostics and control in a component-based production line
- (57) The invention relates to the integration of diagnostics and control in a production line based on process components (10). Preferably, the control system and the diagnostic system are built as a hierarchical and highly distributed system, where as much as possible of the pre-processing and low-level diagnostics is accomplished at the lower levels of the system. At the process component level, diagnostics (12) are integrated with the control software (11) controlling the process hard-

ware of the production line. The production line is typically comprised of a number of cells of process components, and each cell is controlled by a cell controller (20). At the cell level, diagnostics (22) are integrated in the cell control software (21) of the cell controllers (20). For example, diagnostic functions could be integrated with the control software programs by extending the IEC 1131-3 SFC language with diagnostic functions, or precompiling the source code of the control program and adding code for diagnostic functions.

## LACK OF UNITY OF INVENTION SHEET B

**Application Number** 

EP 99 20 3127

The Search Division considers that the present European patent application does not comply with the requirements of unity of invention and relates to several inventions or groups of inventions, namely:

1. Claims: 1-35

A diagnostic system in a discrete production line comprising a hierarchical system of components and a method for the engineering of the same  $\frac{1}{2} \int_{-\infty}^{\infty} \frac{1}{2} \left( \frac{1}{2} \int_{$ 

2. Claims: 36-40

First method for integrating diagnostic functions with control software controlling process hardware in a production line

3. Claims: 41-43

Second method (different form the first one in claim 36-40) for integrating diagnostic functions with control software controlling process hardware in a production line

#### ANNEX TO THE EUROPEAN SEARCH REPORT ON EUROPEAN PATENT APPLICATION NO.

EP 99 20 3127

This armex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
